VE Gear was developed to deliver value-engineered turnout gear fully certified to NFPA standards, at a price that meets the needs of more budget-restrained departments. It offers two closure styles, both fully equipped with the necessary options to ensure safe and functional performance.

# VE GEAR AT A GLANCE

**Available Coat Closure Systems**  
All paired with hook and loop

- 32" coat – zipper under flap
- 34" coat – hooks and dees outside flap

**Pant Closure System**

- Hook and dee outside flap paired with military-grade snaps

**Popular Coat Options**

- Back patch with department name
- Choice of required trim packages

**Popular Pant Options**

- Choice of required trim packages

**DuPont®  
Nomex®**

DuPont™ and Nomex® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

Clean-flow Collar  
**Continuously  
Protects Without  
Gaps**

The Clean-flow collar design provides continuous protection by removing the gaps common with standard throat tab designs and eliminating big bulky flaps that add weight and may impede movement. The easy-to-fold-down Clean-flow collar is flexible and comfortable, and interfaces well with all SCBA units.

Free-up Sleeve **Allows  
Mobility Without  
Excess Fabric**

Unlike most turnout coats, the Free-up sleeve design is an engineered lightweight alternative that does not rely on bulky gussets to maximize mobility, comfort, and reach. The innovative side seam and sleeve interface distribute the underarm stress evenly, resulting in minimal coat rise and maximum comfort for all body types.

X-protect Closure  
**Provides  
Uninterrupted  
Protection**

All hook-and-dee-equipped turnout coats have positive closure systems, but only the X-protect closure offers uninterrupted protection. Having the hook and loop strategically offset on the inner flap prevents gaps along the closure and ensures that protection is not compromised. Available in 34" hook and dee only.
